EDUCATION

Master of Science in Computer Applications
Modern College of Arts, Science and
Commerce

07/2022 - 06/2024

CGPA: 9.36/10

- Web Programming
- .NET & Android Technology
- Cloud and Grid Computing
- Advance Operating Systems

WORK EXPERIENCE

Cyber Security Intern
Prodigy InfoTech

08/2024 - 09/2024

India

- Developed a Caesar Cipher in Python for secure data encryption.
- Engineered image encryption using advanced pixel manipulation techniques.
- Designed a robust password complexity checker and a lightweight keylogger for security analysis.

ORGANIZATIONS

Vice-Captain, National Service Scheme NSS (01/2020 - 05/2021)

Led a 10-member team in various activities, including planting seedlings and conducting drama acts with social causes. I worked closely with the team and the Captain to ensure all assigned duties were completed efficiently and effectively.

CERTIFICATES

CompTIA Security+ (Expected 02/2025)

INE eJPTv2 (Expected 06/2025)

Cisco Certified CyberOps Associate

Google Cybersecurity Professional

Introduction to Splunk

Qualys Vulnerability Management

SKILLS

PERSONAL PROJECTS

SOC Automation Home Lab

- Configured a comprehensive SOC lab using Wazuh for log monitoring and TheHive for case management.
- Automated alert systems with Shuffle for timely SOC notifications and integrated Mimicatz detection.
- Technologies Used: Wazuh, TheHive, Shuffle, Python.

Python Remote Keylogger

- Developed a remote keylogger disguised as an executable file to monitor user input for penetration testing.
- Enabled secure remote data collection and analysis for ethical hacking scenarios and stored data in txt file as collection bin to be used by attacker.
- Technologies Used: Python

VPN Server on AWS

- Deployed a secure OpenVPN server on AWS EC2 instances using Ubuntu.
- Ensured encrypted communication for remote users by configuring a robust VPN environment
- Technologies Used: AWS EC2, Ubuntu, OpenVPN.

Online Dairy

Built a PHP-based web application integrated with Paytm Payment Gateway for seamless online transactions. Designed and implemented a responsive interface using Bootstrap, CSS, and JavaScript.t
Technologies Used: PHP, HTML, Bootstrap, CSS, JavaScript.

Money Tracker

Created user-friendly Android applications with dynamic functionality using Kotlin and XML. Managed source control and versioning effectively through GitHub.
Technologies Used: Kotlin, Firebase, XML, GitHub.
